To Whom It May Concern,

After careful consideration, Your Community Credit Union chose Trilogy Solutions Construction, LLC to build our new prototype branch. Not only did TSC complete the job on time and within budget, but their level of customer service was beyond our expectation. They consistently kept us informed and looked out for our best interest when they encountered things we had not considered. We were impressed with their demand for excellence in the work of their subcontractors as well. TSC also offered us VE alternatives at the onset of the job which helped bring our overall project in line with our budget.

I recommend Trilogy Solutions Construction, LLC to anyone interested in a high degree of integrity in their project and a company who accepts responsibility for the job.

Sincerely,

Lisa Connell
